# GGC Accounting System — Master Prompt

Final version · Oct 29, 2026 · @Nina

## 1. Role and goal

You are building GGC Books: a web app, with Airtable as the database, that runs the full accounting cycle for Go Go Chicken and The Nest: one business with one Balance Sheet and separate Income Statements. That means daily entry, journals, ledger and T-accounts, trial balance, adjusting entries, month-end close, and the Balance Sheet, Income Statement and Cash Flow Statement.

The app is for internal management decisions only. BIR tax compliance runs in a separate accounting system. Do not build tax filing, VAT, percentage tax, expanded withholding or income tax provisioning.

The team logs in with individual accounts. What each person can see and do depends on their role (Section 4).

How to use this prompt:

- Every accounting rule here was decided by management (Nina Laluna). Build exactly these rules.
- Never add, change or infer an accounting treatment. If a case is not covered, stop and ask, or route the item to the For Classification queue (Section 3).
- Items marked PROVISIONAL in Section 13 are still awaiting management confirmation. Build them so they are easy to change.
- Airtable limits matter at GGC's volume of roughly 1,000–1,500 records a month (estimate). Design for Airtable's API rate limit of 5 requests per second per base (source). Keep stored period balances so statements don't recompute from every line.

### Tech stack

| Layer | Choice | Rules |
|---|---|---|
| Database | Airtable, Team plan, 2 seats (Nina and Kai) | One workspace, one base for GGC and The Nest together, with the tables in Section 11. Only Nina and Kai log into Airtable directly. |
| Web app and server code | Cloudflare Pages + Workers, on a free subdomain to start (PROVISIONAL: Vercel Pro if management chooses it instead) | The Airtable token lives only in server code, never in the browser. Every rule in this prompt (roles, company separation, balancing, approvals, period locks) is enforced on the server, not only in the screens. |
| Logins | Clerk or Supabase Auth | One login per person. Each user's role and company access is stored with their login. App users never need Airtable seats. |
| Build | Claude Code | Builds, tests and deploys the app from this prompt. |
| GoHighLevel | Optional link only | GHL may link to or embed the app. It never hosts the app or holds the Airtable token. |

Moving from the free subdomain to a custom domain later must need only a configuration change.

## 2. Business context and the two sets of books

Go Go Chicken is a fried chicken business in Davao City. Its legal entity is Quintet Allied Services & Ventures Corp. Quintet and Go Go Chicken are one and the same company, so the app never uses a "Due to/from Quintet" account. Currency is Philippine peso (₱).

For GGC, the app keeps two internal ledgers, called books. They are not separate legal entities. Each book has its own Trial Balance, Income Statement, Balance Sheet and Cash Flow Statement. A Combined view shows the whole company with internal billings and balances removed.

| Book | Covers | Money it holds |
|---|---|---|
| Store | Ponciano branch, plus Pop-ups & Events | Security Bank, GCash, Cash on Hand – For Deposit, Cash on Hand – Petty Cash – Cashier |
| Commissary | Prepares and marinates product, and bills the Store for every transfer | MariBank only (no cash on hand) |

Rules that apply across both books:

- When it is unclear which book an item belongs to, it goes to the Store book.
- Assets go to the book where they physically sit. Store freezers belong to the Store; Commissary equipment belongs to the Commissary.
- Shared costs are not allocated. Each cost goes to the book that paid or used it.
- Pop-ups & Events stay inside the Store book. They have their own sales accounts but no separate cost center.
- Out of scope: CLD and its Puan site, Clarté, Arena and Worqflow. None of their transactions belong in these books.

## The Nest: a profit center in the same business

The Nest shares GGC's registration, building and funding, so it is not a separate company. It is a profit center inside the Store book: it shares the Balance Sheet and Cash Flow Statement, and has its own Income Statement.

- **Profit center tags:** every revenue and expense line in the Store book is tagged GGC or The Nest. Commissary lines are always GGC.
- **Statements:** Income Statements export separately for GGC (Store and Commissary) and for The Nest, plus a total for the whole business that ties to the Balance Sheet. The total shows GGC | The Nest | Shared | Total, and Shared depreciation and amortization appear only there. There is one Balance Sheet and one Cash Flow Statement for the whole business.

- **Shared costs:** utilities, payroll and rent are split manually between GGC and The Nest at entry, as tagged lines that must add up to the full amount. Depreciation follows each asset's tag: GGC, The Nest or Shared. Shared covers assets both sides use and can't be separated, like the leasehold improvements, and is never split. Amortization of Assume Price and pre-opening costs is also tagged Shared. Every other cost is tagged to one profit center. There is no automatic allocation.
- **Cash:** The Nest keeps its own bank, e-wallet and clearing accounts, shown separately inside the one Balance Sheet.
- **No receivables or payables between GGC and The Nest.** When one side's cash pays the other's cost, the cost is simply tagged to the right profit center.
- **Owners:** one capital account, and one set of owner loans and advances per person, for the whole business.
- **Sales channels:** Cash, GCash, Card, Grab and Foodpanda, through The Nest's own accounts, with the same daily-entry and clearing rules as GGC.
- **COGS:** Coffee Beans, Matcha Powders, Genmaicha Powder, Hojicha Powder, Milk & Dairy, Syrups & Sauces, Food & Pastries, and Packaging & Cups. More lines are added through the setup screen (Section 5).
- **Commissary:** the Commissary may supply The Nest in the future. It will then bill The Nest exactly as it bills the Store (template #20), tagged The Nest.
- **Go-live:** November 1, 2026. Nina and Kai approve entries under the same rules as GGC.

## 3. Non-negotiable journalizing principles

The person encoding never chooses debits or credits. They choose a transaction type, and the app builds the journal entry from that type's locked template (Section 7).

1. **Fixed transaction types.** Each type has one approved template. The template sets which accounts are debited and credited, which fields are required, and which sub-accounts the encoder may pick from a filtered list.
2. **Nothing posts incomplete.** An entry must balance and carry its required fields: date, book, amount(s), source document, and the person, supplier, loan, asset or channel the template asks for.
3. **No guessing.** The app never auto-categorizes by keyword or picks a default account that isn't in an approved template.
4. **For Classification queue.** Anything that fits no type goes to this queue and does not post.

    - If cash already moved, the cash side posts to *Suspense – For Classification* so bank reconciliations still tie.
    - Management decides where the item goes. The app then reclassifies it and adds a new template if needed.
    - Every new template or account is logged in the Adjustments & Judgment Log.
5. **Month-end adjustments are generated.** Depreciation, amortization, accruals and the inventory adjustment are built from schedules (Section 8). They post only after owner approval.
6. **Free-form journal entries are restricted.** Only the Owner and Accountant roles can create them. Each needs a written reason and approval from an owner who is not the creator.
7. **Posted entries are never edited or deleted.** Corrections are made by reversing the entry and re-entering it (see Section 4 for the Supervisor's edit and cancel flow).
8. **Closed months are locked.** Corrections to a closed month go in the current open month.
9. **One row per line.** Every journal line stores book, profit center, account, debit or credit amount, the sub-ledger party where the template requires one, the entry it belongs to and its source.
10. **Only Approved entries count.** Statements, ledgers and checks use Approved entries only.

## 4. Users, roles, entry statuses and approvals

Each person has their own login, and their role decides what they see and do. Cashiers have no login. They submit handwritten daily reports, which the Supervisor or Staff encode.

| Role | Who | Can create | Can see | Can approve |
|---|---|---|---|---|
| Owner | Nina, Kai | Everything, including free-form and adjusting entries | Everything | Yes, but never their own entries; can close and reopen months |

| Role | Who | Can create | Can see | Can approve |
|---|---|---|---|---|
| Accountant | None yet (future) | Everything, including free-form entries; prepares the close | Everything | No |
| Supervisor | Store | Daily sales reports, purchases, petty cash expenses, damages (special entry) | All Store entries in detail | No |
| Staff | Store | Daily sales reports, purchases, petty cash expenses (not damages) | Only their own entries | No |
| Commissary In-charge | Commissary | Commissary purchases and transfer billings | Commissary entries only | No |

**Entry statuses.** Every entry moves from Draft, to Submitted, to Approved (posted) or Rejected (with a reason).

- Routine template entries can be approved by an owner in one daily batch.
- Free-form, adjusting and special entries (damages, write-offs, capital decisions) are approved one by one.
- Nobody approves their own entry. Nina′s entries go to Kai, Kai′s go to Nina, and an Accountant′s go to either.

**Supervisor edit and cancel.**

- While an entry is Draft or Submitted, the Supervisor can edit or cancel it freely. Every change is logged.
- Once it is Approved and its month is still open, Edit or Cancel creates a reversing entry plus a corrected entry, both Submitted for owner approval. The original stays visible.
- Once its month is closed, it cannot be edited. The correction goes in the current open month.

**Audit trail.** Every entry stores who created it, who approved it, and when. Attachments are required wherever the template says so. Nothing is ever deleted.

**Profit center access.** Nina and Kai see everything and approve entries for both GGC and The Nest. At The Nest, an Admin Staff and a Supervisor encode daily entries, each with their own login so every entry shows who made it. They use the Staff and Supervisor roles above, limited to entries tagged The Nest. Admin Staff has Staff permissions.

## 5. Chart of Accounts requirements

The base is the Chart of Accounts management approved on October 8, 2026 (attach it to this prompt). It is numbered 1000 Assets, 2000 Liabilities, 3000 Equity, 4000 Revenue, 5000 Cost of Goods Sold, 6000 Operating Expenses and 7000 Other Income/Expenses.

Every account is tagged with the book(s) it belongs to: Store, Commissary or both. The accounts below must exist; add any that are missing. Names in brackets are sub-ledgers tracked per party.

| Group | Accounts that must exist | Book |
|---|---|---|
| Cash | Security Bank; GCash; Cash on Hand – For Deposit; Cash on Hand – Petty Cash – Cashier | Store |
| Cash | MariBank | Commissary |
| Clearing (sale-date to payout) | Card Sales Due for Transfer; Grab Sales Due for Transfer; Foodpanda Sales Due for Transfer | Store |
| Receivables | Receivable from Employees – Cash Shortages / Cash Advances / Food Charges / Damages & Losses [per employee]; Advances to Owners [per owner]; Advances to Suppliers [per supplier]; Creditable Withholding Tax | Store (employees by book) |
| Intercompany | Due from Store (Commissary); Due to Commissary (Store) | Each side |
| Inventory | Inventory – [per counted ingredient] | Both |
| Prepaids and deferred charges | Prepaid Expenses [per item]; Deferred Charges – Assume Price; Deferred Charges – Pre-opening Costs; Deferred Charges – Small Items (legacy spread) | By book |

| Group | Accounts that must exist | Book |
|---|---|---|
| Deposits and suspense | Refundable Deposits [per deposit]; Suspense – For Classification | By book |
| Fixed assets | Property & Equipment – Renovation / Equipment / Furniture; Accumulated Depreciation per class | By location |
| Payables | Accounts Payable [per supplier]; Reimbursements Payable [per person]; Salaries Payable; SSS / PhilHealth / Pag-IBIG Payable; Withholding Tax on Compensation Payable; 13th Month Pay Payable | By book |
| Loans | Loans Payable [per loan]; Loans Payable – Owner [per owner]; Accrued Interest Payable | Store by default |
| Equity | Owner's Capital (single account); Retained Earnings; Current Year Earnings (computed) | Store |
| Revenue | Sales – Cash / GCash / Card / Grab / Foodpanda; Pop-up & Event Sales – Cash / GCash / Card; Sales – Staff Charges; Sales Discounts – SC/PWD and Sales Discounts – Promo (deducted from sales) | Store |
| Revenue | Transfer Billings to Store | Commissary |
| Cost of Goods Sold | Rice; Breading; Marinate; Raw Chicken; Sauces; Cooking Oil; Packaging; LPG; Inventory Adjustment [per ingredient] | Both |

| Group | Accounts that must exist | Book |
|---|---|---|
| Operating expenses | Utilities – Electric / Water / Other; Maintenance (Pest Control, Aircon Cleaning, Repairs); Marketing (Steph's Payroll, Ads, Printables); Rent; Salaries & Wages; Employer Contributions; 13th Month Pay; Employee Benefits & Allowances; Platform Commission – Grab / Foodpanda; Card Fees; Platform Deductions – Grab / Foodpanda; Store & Kitchen Supplies; Smallwares & Small Equipment; Depreciation Expense; Amortization Expense; Taxes & Licenses; Tax Penalties & Surcharges; Bank Charges | By book |
| Other income and expenses | Interest Expense; Loan Fees & Charges; Cash Over/Short; Loss on Disposal; Other Income | By book |
| The Nest | The Nest's own cash, e-wallet and clearing accounts; The Nest's COGS lines (Section 2). Revenue and expense accounts are shared, with a GGC or The Nest tag on every line. | Store |

Keep every other account from the approved Chart of Accounts. COGS holds food and packaging only. Non-food supplies never go to COGS.

## Adding accounts and suppliers

The app must be flexible. An Owner can add accounts and suppliers from a setup screen, for GGC or The Nest, without changing code.

- **New account:** company, code (unique, within the right 1000–7000 range), name, type, normal balance, book tag, statement line and cash flow category. The app refuses an account missing any of these.
- **Accounts are never deleted once they have postings.** They can only be deactivated. Deactivated accounts stay in history and reports.

- **New supplier:** company, name, contact details, payment terms, the books it supplies, and the items it supplies. Possible duplicate names are flagged.
- Every new account or supplier records who added it and when, and appears in the Adjustments & Judgment Log.
- A new COGS or expense account appears automatically in the expense pick list. A new balance sheet account can be used only through a free-form entry until an Owner approves a template for it. Owners add accounts. Supervisors may add suppliers, but each new supplier needs Owner approval before it can be used.

## 6. Accounting policies

The books run on an accrual basis: income is recorded when earned and costs when incurred, not when cash moves. The exception is ingredients and supplies, which are expensed when bought, not when used.

**Sales**

- One sales entry per channel per day, taken from the POS daily reading. Item- and receipt-level detail stays in the separate Sales Analysis.
- Store channels are Cash, GCash, Card, Grab and Foodpanda. Pop-ups & Events have Cash, GCash and Card. Maya is not a channel.
- Sales are recorded at menu price. Senior/PWD and promo discounts each go on their own line, deducted from sales.
- Refunds and voids are already netted out by the POS. They are kept on a separate Refunds & Voids List outside the ledger, for reference only.
- Grab, Foodpanda and Card sales are recorded gross (full menu amount) from November 1, 2026. History before that stays at net received.
- Grab, Foodpanda and Card sales post on the sale date to their "Due for Transfer" clearing account. The payout clears it.
- Commissions, card fees, platform penalties and adjustments, and any tax withheld from payouts each go on their own line. Tax withheld goes to *Creditable Withholding Tax* so certificates can be requested.
- GCash is instant. GCash sales post straight to the GCash account, with no clearing account.
- Grab and Foodpanda sales are entered daily from the POS reading and matched weekly against the platforms' weekly statements.

- Staff food charges are sales under *Sales – Staff Charges* at menu price, with a receivable per employee deducted on the next payroll. There are no staff prices.

**Cash**

- Cashiers count cash daily on a handwritten report. The Supervisor double-checks it and encodes it with a photo of the report attached.
- Counted cash is split into *For Deposit* and *Petty Cash – Cashier*. Petty Cash – Cashier is whatever coins and loose bills are left for the next day; it has no fixed amount and is topped up from cash sales.
- Petty Cash – Cashier pays both change and expenses. Every expense is noted on the cashier's report with its receipt.
- A cash shortage goes to *Receivable from Employees – Cash Shortages* for that employee. It is never auto-deducted from pay.
- Shortages management decides not to collect are written off to *Cash Over/Short*. Overages go to *Cash Over/Short* as income.
- No-receipt purchases are allowed only up to ₱300, with Supervisor approval. Above that, a receipt is required. Expenses without receipts are flagged "unsupported" until approved.

**Commissary and Store**

- The Commissary bills the Store for every transfer, using a fixed price list kept outside the app. Billings are entered manually, one line per product.
- Each Commissary product is mapped to one of the eight COGS accounts (for example, Marinated Chicken → Raw Chicken). The Store's COGS posts through this mapping.
- Billings increase *Due from Store* (Commissary) and *Due to Commissary* (Store). Commissary expenses paid by the Store reduce both.
- The Store settles the full balance monthly by transfer to MariBank. The two balances must always mirror each other.

**Purchases and payables**

- Purchases are recorded when incurred. Credit purchases go to *Accounts Payable* for that supplier until paid.
- A supplier master list tracks payment terms and supports cost comparison. Purchases of the eight COGS ingredients carry quantity, unit and unit price.
- Purchases paid with personal funds are recorded when bought, as reported by the owner, with *Reimbursements Payable* for that person until repaid.

- Advance payments to suppliers go to *Advances to Suppliers* until the goods arrive.
- Non-food supplies go to *Store & Kitchen Supplies* under operating expenses.

**Inventory**

- Ingredients are expensed when bought. The month-end count is optional, and is entered per ingredient and per book.
- The Commissary and the Store count different items in different units. Each book keeps its own count list.
- Raw ingredients are valued at the latest purchase price. Items made in-house (sauces, spreads, marinated chicken) are valued at the transfer price list.
- The adjustment is the change from last month's count, shown per ingredient under *Inventory Adjustment*, never buried in purchases.
- If a month isn't counted, the last count carries forward and the month is flagged "not counted."

**Payroll**

- Payroll is computed outside the app and entered as one summary per pay period per book.
- Gross pay is the expense. Employee and employer SSS, PhilHealth and Pag-IBIG contributions are held as payables until remitted.
- Withholding tax on staff pay is built in, but used only if pay goes above the taxable level.
- Pay periods are the 1st–15th (paid on the 20th) and the 16th–month-end (paid on the 5th). Each is recorded on its coverage end date as *Salaries Payable*.
- 13th month pay is accrued at 1/12 of basic pay on the last day of each month.
- Steph's pay always goes to *Marketing – Steph's Payroll*, never staff salaries.
- Cash advances, food charges, shortages and damages are tracked per employee in separate receivable accounts.
- *Employee Benefits & Allowances* exists but is unused for now.
- The paying account (bank, GCash or petty cash) is chosen at entry. There is no fixed rule.

**Fixed assets, prepaids and deposits**

- An item is capitalized as an asset only if its full cost, counting all installments, is ₱3,000 or more.

- From November 1, 2026, items under ₱3,000 are expensed in the month bought, to *Smallwares & Small Equipment*. Items already being spread finish their remaining months.
- Depreciation is straight-line, with zero salvage value. It starts in the month the item is put to use and counts a full month.
- Useful lives: equipment 1.5 years (18 months), furniture 2 years, renovation 2 years.
- Assume Price (non-recoverable, so amortized rather than treated as a real asset) and February–March pre-opening rent are amortized over 24 months. Other pre-opening costs are amortized over 12 months. All of this started April 2026.
- The ₱50,000 Worqflow furniture refund reduces renovation cost.
- Repairs always go to *Maintenance*, whatever the amount.
- Disposed, broken or lost assets: remaining book value goes to *Loss on Disposal*. Any amount charged to an employee reduces the loss, and any charge above book value goes to *Other Income*. Damages are a special entry, not a template.
- Prepaids covering more than one month and costing ₱3,000 or more are spread over the months covered. Below ₱3,000, they are expensed in the month paid.
- Refundable deposits (rent and others) are held as assets, one line each, and never expensed.
- Assets bought for pop-ups carry a "purchased for pop-ups" note.

**Loans and owners**

- Each loan has its own *Loans Payable* sub-account. Every installment is split into principal and interest using the loan schedule.
- Interest is accrued monthly to *Accrued Interest Payable* and cleared when paid. Loan fees are expensed in the month the loan is released.
- For informal loans with no lender schedule, one is built from the agreed terms. The Balance Sheet shows the portion due within 12 months separately.
- Money an owner puts in is a loan by default, under *Loans Payable – Owner* per person, with no interest unless agreed in writing. It becomes capital only by an explicit management decision, through a free-form entry.
- Money an owner takes out is an *Advance to Owner*, tracked per person.
- Owner loans and owner advances are always tracked separately and never netted.
- There is one *Owner's Capital* account. Ownership shares are not tracked yet.

**Tax (internal view only)**

- Quintet is non-VAT for now. Whether it needs to register for VAT is a separate discussion outside this app.
- No percentage tax, VAT, expanded withholding or income tax is computed. The Income Statement ends at net income before tax.
- Tax penalties and surcharges go to their own account when paid. Local business tax and the mayor's permit follow the prepaid rule.

## 7. Transaction types and journal templates

These are the only ways an entry can be created. The encoder picks the type and fills in amounts and parties; the app writes the debits and credits. "Expense line" means the encoder picks from that template's allowed list: one of the eight COGS accounts for ingredients, otherwise an operating expense account. Every revenue and expense line also carries a profit center tag (GGC or The Nest; depreciation and amortization may also be Shared). Utilities, payroll and rent can be split across both in one entry, and the split must add up to the total.

| # | Transaction type | Book | Debit | Credit | Required / notes |
|---|---|---|---|---|---|
| 1 | Daily Cash Sales | Store | Cash on Hand – For Deposit; Cash on Hand – Petty Cash – Cashier (amount left); Sales Discounts – SC/PWD / Promo; Receivable from Employees – Cash Shortages (if short) | Sales – Cash (menu price); Cash Over/Short (if over) | Photo of handwritten report; cashier name for any shortage |
| 2 | Daily GCash Sales | Store | GCash; Sales Discounts | Sales – GCash | POS reading |
| 3 | Daily Card Sales | Store | Card Sales Due for Transfer; Sales Discounts | Sales – Card | POS reading |
| 4 | Daily Grab / Foodpanda Sales | Store | Grab or Foodpanda Sales Due for Transfer; Sales Discounts | Sales – Grab or Foodpanda (menu price) | POS reading |

| # | Transaction type | Book | Debit | Credit | Required / notes |
|---|---|---|---|---|---|
| 5 | Pop-up & Event Sales | Store | Cash on Hand – For Deposit, GCash or Card Sales Due for Transfer; Sales Discounts | Pop-up & Event Sales – Cash / GCash / Card | Event name |
| 6 | Staff Food Charge | Store | Receivable from Employees – Food Charges | Sales – Staff Charges (menu price) | Employee |
| 7 | Card Payout | Store | Security Bank (net); Card Fees | Card Sales Due for Transfer | Bank credit reference |
| 8 | Grab / Foodpanda Payout | Store | Security Bank or GCash (net); Platform Commission; Platform Deductions; Creditable Withholding Tax | Grab or Foodpanda Sales Due for Transfer | Weekly platform statement attached |
| 9 | Cash Deposit | Store | Security Bank | Cash on Hand – For Deposit | Deposit slip |
| 10 | Transfer Between Own Accounts | Same book | Receiving account | Sending account | Both references |
| 11 | Petty Cash Expense | Store | Expense line | Cash on Hand – Petty Cash – Cashier | Receipt (or under-₱300 approval); Commissary items use #19 |
| 12 | Purchase – Paid | Either | Expense line | Security Bank, GCash or MariBank | Supplier; receipt; quantity, unit and unit price for COGS ingredients |
| 13 | Purchase – On Credit | Either | Expense line | Accounts Payable [supplier] | Supplier; invoice; delivery date |
| 14 | Supplier Payment | Either | Accounts Payable [supplier] | Security Bank, GCash or MariBank | Invoice(s) paid |
| 15 | Supplier Advance | Either | Advances to Suppliers [supplier] | Bank or GCash | Supplier |
| 16 | Advance Applied on Delivery | Either | Expense line | Advances to Suppliers [supplier] | Delivery receipt |
| 17 | Personal-Fund Purchase | Either | Expense line | Reimbursements Payable [person] | Owner's report; receipt |

| # | Transaction type | Book | Debit | Credit | Required / notes |
|---|---|---|---|---|---|
| 18 | Reimbursement Paid | Either | Reimbursements Payable [person] | Bank or GCash | Purchases covered |
| 19 | Store Pays a Commissary Cost | Both | Store: Due to Commissary · Commissary: Expense line | Store: Bank, GCash or Petty Cash · Commissary: Due from Store | Receipt; posts in both books together |
| 20 | Commissary Transfer Billing | Both | Commissary: Due from Store · Store: COGS account per product mapping | Commissary: Transfer Billings to Store · Store: Due to Commissary | One line per product; delivery slip |
| 21 | Monthly Commissary Settlement | Both | Store: Due to Commissary · Commissary: MariBank | Store: Security Bank or GCash · Commissary: Due from Store | Clears the full balance |
| 22 | Payroll Accrual (15th and month-end) | Each book | Salaries & Wages (Steph: Marketing – Steph's Payroll); Employer Contributions | SSS / PhilHealth / Pag-IBIG Payable (employee and employer share); Withholding Tax on Compensation Payable (if any); Receivable from Employees (deductions); Salaries Payable | Payroll summary attached |
| 23 | Payroll Payment (5th and 20th) | Each book | Salaries Payable | Bank, GCash or Petty Cash | Pay period |
| 24 | Contributions Remittance | Each book | SSS / PhilHealth / Pag-IBIG Payable; Withholding Tax on Compensation Payable | Bank or GCash | Remittance proof |
| 25 | 13th Month Payment | Each book | 13th Month Pay Payable | Bank or GCash | Employee list |
| 26 | Employee Cash Advance | Each book | Receivable from Employees – Cash Advances [employee] | Bank, GCash or Petty Cash | Signed acknowledgment |

| # | Transaction type | Book | Debit | Credit | Required / notes |
|---|---|---|---|---|---|
| 27 | Employee Receivable Collected (outside payroll) | Each book | Bank, GCash or Cash on Hand | Receivable from Employees [type, employee] | Receipt |
| 28 | Shortage Write-off | Store | Cash Over/Short | Receivable from Employees – Cash Shortages [employee] | Owner approval, one by one |
| 29 | Asset Purchase (₱3,000 and up) | By location | Property & Equipment [class] | Bank, GCash or Accounts Payable | Creates a Fixed Asset Register record; in-use date; installments counted; tag GGC, The Nest or Shared |
| 30 | Small Item (under ₱3,000) | Either | Smallwares & Small Equipment | Bank, GCash, Petty Cash or Accounts Payable | Receipt |
| 31 | Prepaid Payment (₱3,000 and up, more than one month) | Either | Prepaid Expenses [item] | Bank or GCash | Coverage start and end; creates a spread schedule |
| 32 | Refundable Deposit Paid / Refunded | Either | Paid: Refundable Deposits [deposit] · Refunded: Bank | Paid: Bank · Refunded: Refundable Deposits | Agreement |
| 33 | Loan Proceeds | Store by default | Bank or GCash (net received); Loan Fees & Charges | Loans Payable [loan] (principal) | Creates a Loan Tracker record and schedule |
| 34 | Loan Installment | Same as loan | Loans Payable [loan] (principal, from schedule); Accrued Interest Payable (interest accrued); Interest Expense (any interest not yet accrued) | Bank or GCash | Split always taken from the schedule |
| 35 | Owner Money In | Store | Bank or GCash | Loans Payable – Owner [owner] | Owner name |
| 36 | Owner Loan Repayment | Store | Loans Payable – Owner [owner] | Bank or GCash | Owner approval |

| # | Transaction type | Book | Debit | Credit | Required / notes |
|---|---|---|---|---|---|
| 37 | Owner Money Out | Store | Advances to Owners [owner] | Bank or GCash | Owner name |
| 38 | Owner Advance Returned | Store | Bank or GCash | Advances to Owners [owner] | Owner name |
| 39 | Unclassified Cash Movement | Either | Suspense or bank (side as needed) | Bank or Suspense | Goes to the For Classification queue; must be cleared before close |
| 40 | Bank Charges | Either | Bank Charges | Security Bank, GCash or MariBank | Bank statement or transfer receipt; covers service charges and transfer fees |
| 43 | Opening Balances | Each book | Each balance sheet account with a debit balance | Each balance sheet account with a credit balance | One per book, dated October 31, 2026; must balance; per-party detail for suppliers, employees, owners, loans and assets; Owner-approved |

**Special entries (free-form, owner-approved one by one, no template):** damages and disposals, conversion of an owner loan to capital, and corrections not covered by reversal.

## 8. Month-end adjusting entries and close

Each month closes by the 10th of the following month. The 10th falls after the payroll paid on the 5th, so every close has the same cadence. Until it closes, the month's statements are labeled **Preliminary**; after, **Final**.

### Adjusting entries the app generates, for owner approval

| Adjustment | Debit | Credit | Source |
|---|---|---|---|
| Payroll, 16th to month-end | Salaries & Wages; Employer Contributions | Payables per template #22 | Payroll summary |

| Adjustment | Debit | Credit | Source |
|---|---|---|---|
| 13th month accrual | 13th Month Pay | 13th Month Pay Payable | 1/12 of the month's basic pay, dated the last day |
| Depreciation | Depreciation Expense | Accumulated Depreciation [class] | Fixed Asset Register, per asset, per book and per tag (GGC, The Nest or Shared) |
| Amortization | Amortization Expense (or Rent for pre-opening rent) | Deferred Charges / Prepaid Expenses [item] | Spread schedules |
| Interest accrual | Interest Expense | Accrued Interest Payable | Loan schedules |
| Inventory adjustment (if counted) | Inventory [ingredient] if stock went up; Inventory Adjustment [ingredient] if it went down | The other side | This month's count vs last month's |

**Close checklist.** The app shows it as a checklist and blocks the close until every step passes.

1. All daily reports for the month are encoded. No entries are left in Draft or Submitted.
2. The card clearing account is matched to payouts, and Grab and Foodpanda are matched to their weekly statements.
3. Security Bank, GCash and MariBank are reconciled to their statements, and the Cash on Hand accounts to their counts. Differences are reported.
4. *Suspense – For Classification* is zero, and the For Classification queue is empty.
5. *Due to Commissary* equals *Due from Store*.
6. Adjusting entries are posted and approved.
7. Every check in Section 10 passes.
8. An owner marks the month Final. The month locks. Only an owner can reopen it, and the reason is logged.

**Year-end.** On December 31, revenue and expense accounts close to *Retained Earnings*, and the app produces a post-closing trial balance.

## 9. Reports and financial statements

Statements update in real time from Approved entries only.

- **Income Statement:** exported separately for GGC (Store, Commissary, and GGC as a whole) and for The Nest, plus a total for the whole business that ties to the Balance Sheet, with columns GGC | The Nest | Shared | Total. Shared depreciation and amortization appear only in the total.
- **Balance Sheet and Cash Flow Statement:** one for the whole business, with Store-book and Commissary-book views.
- Whole-business views remove *Transfer Billings to Store* against the Store's matching COGS, and *Due from Store* against *Due to Commissary*.

**Financial statements**

| Statement | Views | Notes |
|---|---|---|
| Income Statement | Monthly; year-to-date; current vs prior month (₱ and %) | COGS shown per ingredient, plus Inventory Adjustment on its own line; ends at net income before tax |
| Balance Sheet | As of month-end; vs prior month-end | Loans split into due within 12 months and later |
| Cash Flow Statement | Monthly; year-to-date | Direct method: Operating (sales receipts, ingredient purchases, payroll, utilities, other expenses, interest paid as its own line); Investing (asset purchases; refundable deposits paid and refunded); Financing (loan proceeds and principal, owner loans in and out, owner advances, capital) |

| Statement | Views | Notes |
|---|---|---|
| Cash Flow per Account | Monthly; year-to-date | One statement each for Security Bank, GCash, MariBank, Cash on Hand – For Deposit and Cash on Hand – Petty Cash – Cashier, and each of The Nest's cash accounts: opening, inflows and outflows by category, closing; must tie to the ledger and the reconciliation |

**Accounting cycle views**

- Journal: every entry with its lines, status, creator, approver and attachment.
- General Ledger: running balance per account per book, drilling down to the entry and its receipt.
- T-accounts: per account per month, showing opening balance, debits on the left, credits on the right, and closing balance.
- Trial Balance: unadjusted, adjusted and post-closing, per book and combined.

**Sub-ledgers and trackers**

- Accounts Payable per supplier, with aging.
- Supplier cost comparison: quantity, unit and unit price over time for the eight COGS ingredients.
- Employee receivables per person, split by shortages, advances, food charges and damages.
- Owner loans and owner advances per person, shown separately.
- Reimbursements Payable per person.
- Loan Tracker per loan: lender, principal, rate, term, start date, schedule (due date, payment, principal, interest, amount paid, date paid, remaining balance, status Paid / Due / Overdue).
- Fixed Asset Register: asset, book, profit center tag (GGC, The Nest or Shared), date acquired, cost, useful life, method, monthly depreciation, accumulated depreciation, net book value.
- Prepaid and deferred charge schedules.
- Clearing accounts: unpaid card, Grab and Foodpanda balances by age.

- Commissary billings by product. Refunds & Voids List. Cash shortage report per cashier. Inventory counts per book.

**Monthly management report.** The report contains:

1. A management summary of up to 5 points. It leads with the cash position, whether the next payroll is covered, and any loan payments due within 30 days.
2. The statements, with the GGC and The Nest Income Statements shown separately, and Store and Commissary shown within GGC.
3. A COGS breakdown per ingredient in ₱ and as % of sales, both monthly and on a rolling 3-month basis.
4. A loan summary.
5. Key ratios: COGS %, labor %, utilities %, marketing %, net margin, debt service as % of sales, and cash runway in weeks.
6. The Adjustments & Judgment Log.
7. Red flags and decisions needed.
8. Open items.

Because ingredients are expensed when bought, single-month margins swing with purchase timing. COGS and margin trends always use the rolling 3-month view.

## 10. Checks and controls

One Checks page shows every test below as pass or fail, per book and combined. A month cannot close while any test fails.

| Check | Passes when |
|---|---|
| Entries balance | Every entry's debits equal its credits (also enforced before posting) |
| Trial balance | Total debits equal total credits, per book and combined |
| Balance Sheet | Assets equal liabilities plus equity |
| Cash | Cash Flow closing cash equals Balance Sheet cash, for each cash account |

| Check | Passes when |
|---|---|
| Bank reconciliation | Security Bank, GCash and MariBank ledger balances reconcile to statements; unreconciled items listed |
| Loans | Each *Loans Payable* balance equals its Loan Tracker remaining balance; accrued interest matches the schedule |
| Fixed assets | Cost, accumulated depreciation and net book value equal the Fixed Asset Register totals |
| Intercompany | *Due to Commissary* equals *Due from Store* |
| Sub-ledgers | Accounts Payable, employee receivables, owner loans, owner advances and reimbursements each equal the sum of their per-party balances |
| Suspense | *Suspense – For Classification* is zero at close |
| Clearing accounts | No card balance older than 10 days, and no Grab or Foodpanda balance older than 14 days |
| Data quality | Flags possible duplicates (same date, amount and supplier), missing dates, unusual amounts and expenses without receipts |
| Profit center tags | Every revenue and expense line is tagged GGC or The Nest (depreciation and amortization may be Shared), and every split utilities, payroll or rent entry adds up to its total |

## 11. Suggested Airtable data model

The key design choice is to store one record per debit or credit line. That is what makes T-accounts, the trial balance and the statements possible. The tables below are a starting point; the builder may refine the fields.

| Table | Holds | Key links |
|---|---|---|
| Books | Store, Commissary | — |

| Table | Holds | Key links |
|---|---|---|
| Accounts | Chart of Accounts: code, name, type, normal balance, book tag, statement line, cash flow category | Books |
| Periods | One per month: status Open / Preliminary / Final, closed by, closed date | — |
| Parties | Suppliers, employees, owners, lenders, with type and book | — |
| Transaction Types | The Section 7 list: allowed roles, required fields, attachment rule | Template Lines |
| Template Lines | Per type: account (or allowed account list), debit or credit, amount source | Accounts |
| Entries | Header: type, book, date, period, status, created by, approved by, reason, attachments, reversal of / reversed by | Periods, Transaction Types |
| Entry Lines | One per debit or credit: account, amount, party, quantity, unit, unit price | Entries, Accounts, Parties |
| Account Period Balances | Opening, debits, credits and closing per account, per book, per month (feeds statements fast) | Accounts, Periods |
| Daily Reports | Encoded cashier reports: date, channel totals, discounts, cash count, petty cash left, report photo | Entries |
| Commissary Products | Product, unit, mapped COGS account (prices entered per billing) | Accounts |
| Loans and Loan Schedule | Loan terms; installment rows with principal, interest, paid, status | Parties, Entries |
| Fixed Assets and Depreciation Schedule | Register fields; monthly depreciation rows | Entries |

| Table | Holds | Key links |
|---|---|---|
| Spread Schedules | Prepaids and deferred charges with their monthly amounts | Entries |
| Inventory Counts and Count Lines | Per book per month: item, unit, quantity, unit value | Accounts |
| Bank Reconciliations | Per cash account per month: statement balance, ledger balance, reconciling items | Accounts, Periods |
| Refunds & Voids List | Date, channel, amount, reason, approved by (outside the ledger) | — |
| For Classification Queue | Unmatched items, decision, decided by | Entries |
| Users, Roles and Audit Log | Logins, roles, and every create, edit, approve, reverse and reopen action | All |
| Profit Centers | GGC, The Nest and Shared (Shared for depreciation and amortization only), tagged on every revenue and expense line. Nest users see only lines tagged The Nest | Entry Lines, Accounts, Users |

## 12. Go-live

The system goes live on November 1, 2026. Before that, the April–October records are cleaned up. Opening balances are taken from those cleaned-up records as of October 31, 2026, entered per book as one opening entry each.

The opening balances needed:

- Cash: each bank and e-wallet account, plus both Cash on Hand accounts.
- Payables and receivables per party: suppliers, employees, reimbursements, owner loans and owner advances.
- Loans, with their remaining schedules.
- The Fixed Asset Register: cost, in-use date and depreciation to date for each asset.

- Deferred charges and prepaids, with their remaining months.
- Refundable deposits.
- Intercompany balances.
- Capital and retained earnings.

These policies take effect on November 1: delivery and card sales at gross, items under ₱3,000 expensed, payroll recorded on coverage end dates, and month-end inventory counts.

April–October 2026 stays in the manual consolidation and is not loaded into the app. Prior-month comparisons in the app therefore start in December 2026, and 2026 year-to-date in the app covers November and December only. The fiscal year is January–December.

**The app ships clean.** It comes loaded with the Chart of Accounts, transaction templates, roles, checks and reports, but no transactions and no opening balances. Management enters everything else through the app itself:

- The Nest's bank and e-wallet accounts, added through the account setup screen (Section 5).
- Opening balances for the whole business, including The Nest's side, entered through template #43 when management is ready.
- Suppliers, employees, loans and assets, through their setup screens.

## 13. Open items and provisional decisions

All earlier provisional decisions have been confirmed; only the hosting provider (Section 1) is still PROVISIONAL. None of the items below blocks the build. Most are data management will enter through the app once it's built.
